AI CSV Report Generator

Automated Agentic AI Data Analysis Report

Dataset: hospital_data.csv

Generated by: Agentic AI CSV Analysis System

This report contains automated dataset inspection, analysis, visualization and AI-generated insights.

Dataset Overview

Item	Value
rows	50
columns	8
column_names	Patient_ID, Name, Age, Gender, Diagnosis, Stay_Days, Treatment_Cost, Status
missing_values	0
duplicate_rows	0
numeric_columns	Age, Stay_Days, Treatment_Cost
categorical_columns	Patient_ID, Name, Gender, Diagnosis, Status
date_columns	Age, Stay_Days, Treatment_Cost

Data Cleaning

No information available.

Numerical Analysis

Column	Mean	Median	Min	Max	Std Dev	Outliers
Age	41.0800	38.5000	6.0000	78.0000	21.2227	0
Stay_Days	8.0800	8.0000	1.0000	15.0000	4.1445	0
Treatment_Cost	26547.7200	27988.0000	3841.0000	49897.0000	13910.8970	0

Categorical Analysis

Column	Unique Values	Most Common	Count
Patient_ID	50	P0001	1
Name	18	Kiran	5
Gender	2	Female	29
Diagnosis	7	Fever	15
Status	3	Discharged	19

Correlation Analysis

Variable 1	Variable 2	Correlation
Age	Stay_Days	-0.1480
Stay_Days	Treatment_Cost	-0.0820
Age	Treatment_Cost	-0.0540

Time-Series Analysis

No suitable date column found.

AI Generated Report

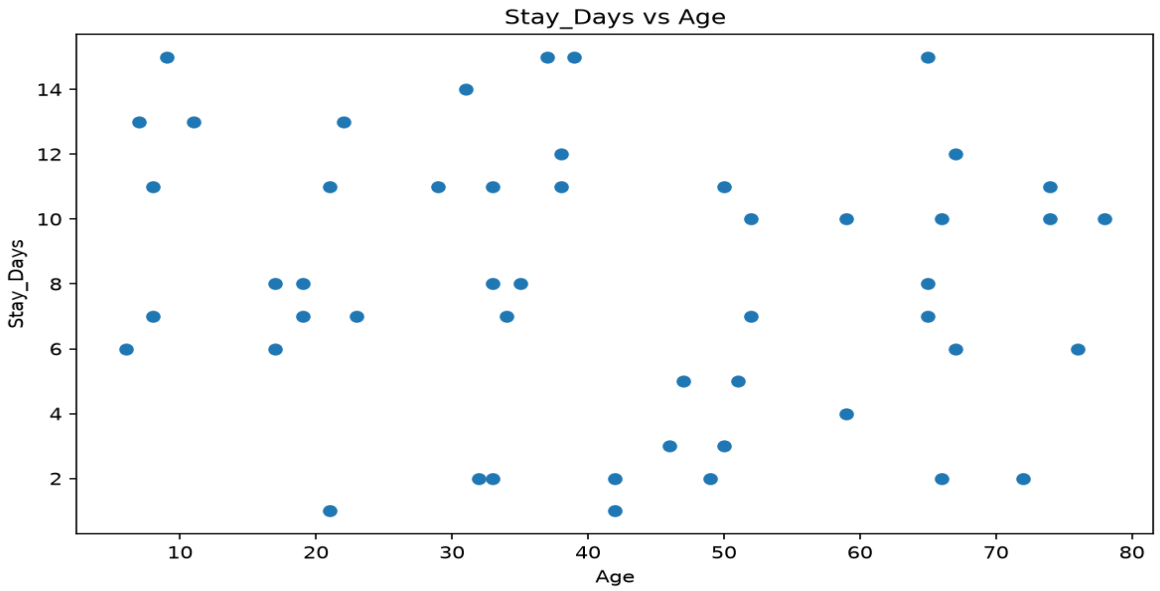

Error

AI report generation failed: Error code: 429 - {'error': {'message': 'You have no credits remaining. Add credits to continue using the API at https://platform.openai.com/settings/organization/billing/.', 'type': 'insufficient_quota', 'param': None, 'code': 'credit_balance_exhausted'}}

Generated Visualizations

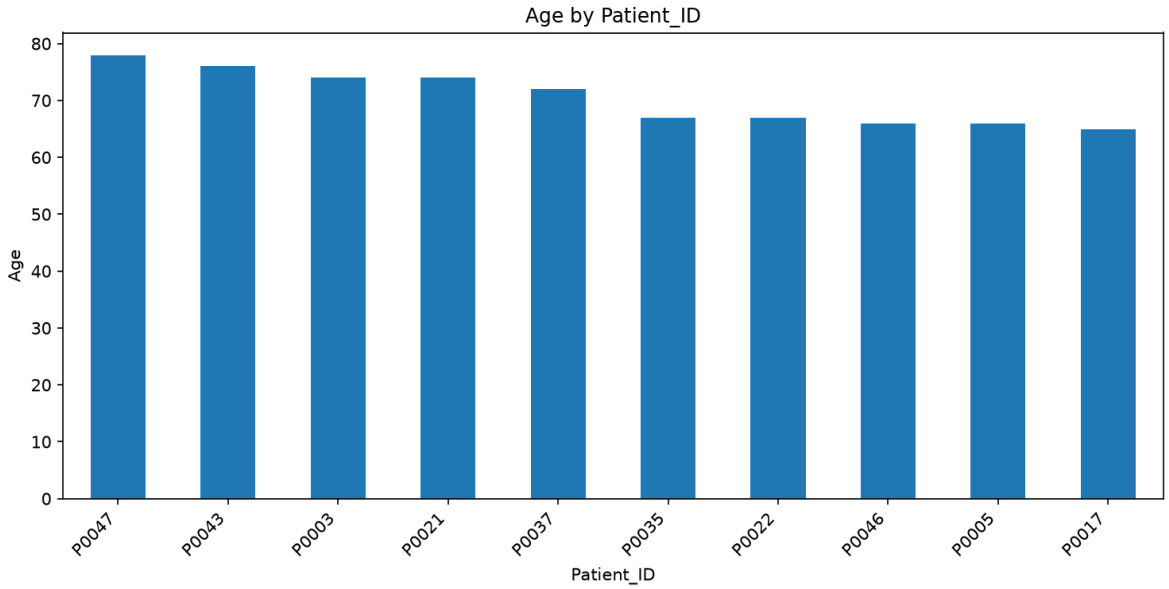

Scatter

Two numeric columns can be compared.

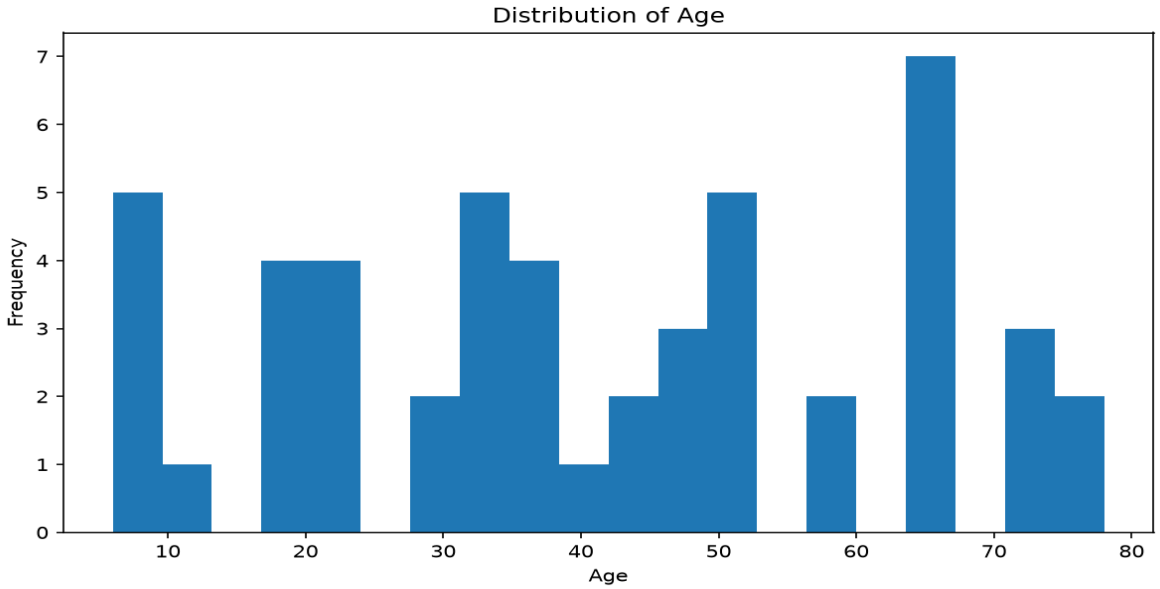

Bar

A categorical column and numeric column are available.

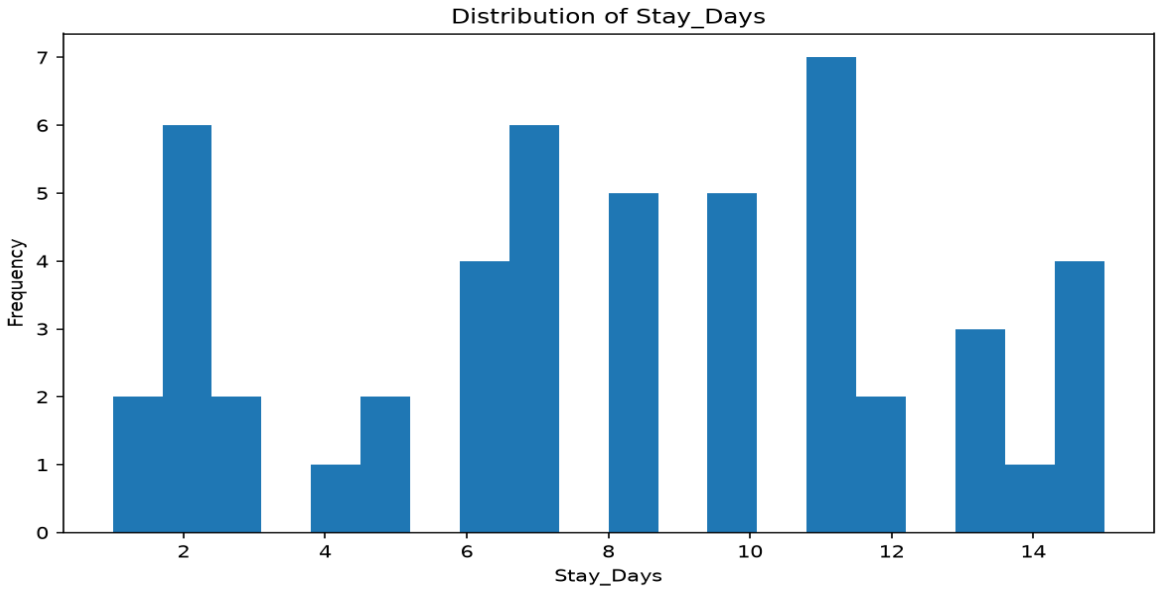

Histogram

A numeric column can show its distribution.

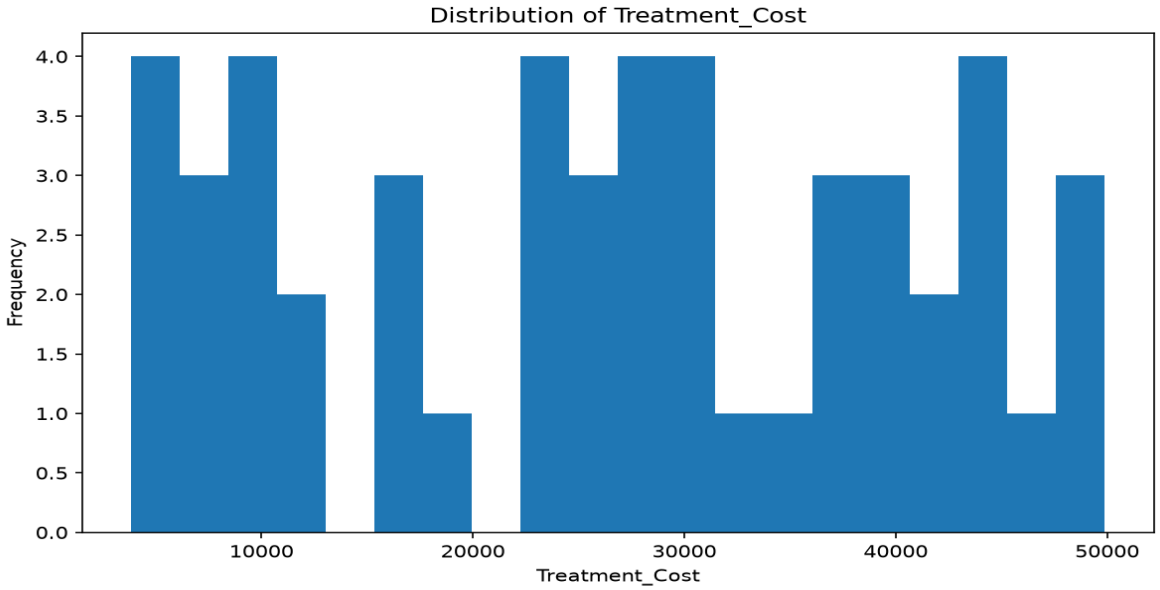

Histogram

A numeric column can show its distribution.

Histogram

A numeric column can show its distribution.

Heatmap

Multiple numeric columns allow correlation analysis.
